Today, Jun 9 NAVITENT INFO RELATED PAST RESULTS DETAILS PRINT SHARE

Summary: This Navitent walks through the keys steps of creating basic Navitent Trails. Elements (24)

STEP 1

Step 1: Select Navitent Trail Kind

The Kind of Navitent determines the format of the "Do" page where the engagement, interaction and feedback happens as Trekkers "do" Navitents. Click on the Element and Element Attachments on the right of this page for an example of the Do page for each Navitent Trail Kind.

Navitent Trail Kinds:

Active Kind - Create Active Navitent Trails for sets and reps for training and exercise.

Nutritive Kind - Create Nutritive Navitent Trails for ingredients and instructions for cuisine and diet.

Cognitive Kind - Create Cognitive Navitent Trails for prompts and responses for the development of mind and soul.

Productive Kind - Create Productive Navitent Trails for actions and responses for activities and skills development.

Instructive Kind - Create Instructive Navitent Trails for steps and directions for activities and projects.

- Elements (5)**
- Active Do Page
 - Nutritive Do Page

STEP 2

Step 2: Create Title and Summary

Create a title that will interest Trekkers in knowing more about your Navitent. Create a summary to describe the content of the Navitent. The title link on every Navitent will take the Trekker to the Details page to learn more about your Navitent before they add it to their library, schedule or do it.

STEP 3

Step 3: Create Goal and Goal Description

Use the formatted Goal to explain the purpose of the Navitent and the Description to give a free form narrative that describes the goal. Goals and Descriptions may be the same for multiple Navitents. Common Goals can be quickly filled in by selecting the Fill With Saved Goal button on the page (see Element Attachment).

- Elements (2)**
- Goal And Description Create Page
 - Fill With Saved Goal

STEP 4

Step 4: Add Elements

Elements are the items, ingredients, materials, step specific document or videos, and/or gear that are helpful or necessary for a Trekker to use while doing a Navitent. Quickly select pre-created or pre-saved lists of Elements you want to use under Filled With Saved List or Elements Library on the top right of the page. See examples of these in the attachments.

- Elements (3)**
- Add Elements Of A Saved List
 - Add Elements From A Saved List
 - Add Individual Elements Previously Used

STEP 5

Step 5: Assemble Your Navitent

Based on the Navitent Kind selected to create, the Assembler page allows you to create and manage the steps for Trekkers to follow.

- Elements (5)**
- Active Create Assembler
 - Nutritive Create Assembler
 - Cognitive Create Assembler
 - Productive Create Assembler
 - Instructive Create Assembler

STEP 6

Step 6: Add Details

Improve Trekker's ability to find your Navitent by including the Level, Type and Phase and selecting the category(ies) and subcategory(ies) that apply.

If your Navitent has a price associated with it, set it up on this page.

- Elements (1)**
- Details Create Page

STEP 7

Step 7: Customize Page

Does your Navitent have custom images, documents or videos associated with it? Add them here (remember you can add more step specific documents and videos using Elements).

Does your Navitent have Navitents that are related to it or that you reference within it? Add them using Related Navitents so your Trekkers can access them easily.

On this page you can also add Environments, Assessments and Science (Variables, Attributes and Hypotheses).

Assessments are surveys or tests to check the condition or change of the Attributes of a Navitent. Assessments can be Trails or Sessions that have been designated as Assessments in the Navitent Type.

Improve how Trekkers find your Navitents and understand what they do and how they work by including Science (Variables, Attributes and Hypotheses).

Variables are the things that your Navitent uses to change the specific Attributes.

Attributes are the things being changed by your Navitent.

Hypotheses are the specific changes that make the Navitent effective in its role in achieving the goal.

The last step is to set up your Publishing Preferences and you are done.

- Elements (6)**
- Add Related
 - Add Environments
 - Add Assessments
 - Add Variables
 - Add Attributes
 - Add Hypotheses

STEP 8

Step 8: Finish

Use this page to review, edit and set up a preview of your Navitent. If you want Trekkers to be able to see your Navitent before they do it, use Setup Preview on this Finish page.
